Jersey City, NJ | (609) 721-8785 | alokwalunj8@gmail.com | [linkedin.com/in/alok-walunj/](https://www.linkedin.com/in/alok-walunj/) | github.com/alokwalunj/

PROFESSIONAL SUMMARY

Data Analyst with 4+ years of experience delivering data-driven insights across healthcare and enterprise domains. Strong expertise in SQL, Snowflake, Tableau, Power BI, and Python for building scalable dashboards, automating reporting workflows, and supporting strategic decision-making. Experienced in working within Agile environments, collaborating with cross-functional teams, and translating business requirements into analytical solutions that improve operational performance and reporting accuracy.

SKILLS

Programming & Querying: SQL, Python (Pandas, NumPy, Matplotlib, Scikit-learn), R

Data Visualization & BI: Tableau, Power BI, Looker

Databases & Warehousing: Snowflake, SQL Server, MySQL

Cloud Platforms: AWS (S3, Athena), Azure

Analytics Techniques: EDA, Statistical Analysis, Hypothesis Testing, A/B Testing, Forecasting, Cohort Analysis

Business & Process Tools: BRD, FRD, UAT, Agile (Scrum), Jira

Other Tools: Advanced Excel (PivotTables, Macros, VLOOKUP), Git, GitHub

PROFESSIONAL EXPERIENCE

CVS Health	Sep 2024 – Present
Business Data Analyst	USA
- Analyze large-scale healthcare, pharmacy, and operational datasets using SQL, Snowflake, and Python to support cost optimization, utilization tracking, and performance reporting initiatives. - Develop and maintain executive-level Tableau dashboards used by business leaders to monitor KPIs, trends, and operational metrics. - Partner with product owners, data engineers, and business stakeholders to gather reporting requirements and translate them into scalable data models. - Standardize KPI definitions and reporting logic across teams to ensure consistent performance measurement and data integrity. - Automate recurring reporting workflows, reducing manual effort and improving reporting turnaround time. - Perform data validation and UAT testing to ensure analytics solutions meet business and compliance standards. - Support data governance efforts by improving documentation, metadata consistency, and reporting accuracy.	
Sphinx Worldbiz Limited	Feb 2022 – Jul 2023
Data Analyst	INDIA
- Designed SQL-based analytical solutions to support forecasting, customer segmentation, and operational performance analysis. - Developed 15+ interactive Tableau dashboards to track business KPIs, anomaly detection, and trend analysis across departments. - Built and maintained AWS-based data pipelines (S3, Athena) to streamline data ingestion and reporting processes. - Conducted exploratory data analysis to uncover performance bottlenecks and operational inefficiencies. - Collaborated with cross-functional teams to deliver insights that supported strategic planning and performance optimization. - Created automated Excel and BI reports that improved reporting accuracy and reduced manual consolidation efforts. - Presented analytical findings to stakeholders and leadership teams through structured reports and dashboard walkthroughs.	
Hexaware Technologies	Jan 2021 – Jan 2022
Junior Business Data Analyst	INDIA
- Performed data cleaning, transformation, and exploratory data analysis on transactional datasets using SQL Server and Python. - Built Power BI dashboards to monitor KPIs and operational performance metrics for internal stakeholders. - Gathered and documented business requirements (BRD, FRD) to align analytical solutions with process objectives. - Conducted hypothesis testing and A/B testing to evaluate process improvements and operational changes. - Assisted in data migration and reporting enhancement projects within Agile delivery cycles. - Collaborated with development and QA teams during UAT to validate solution accuracy and completeness.	

PROJECTS

Sales Performance Analytics Dashboard | Power BI, DAX

- Designed an interactive dashboard to analyze daily, weekly, and monthly sales trends.
- Implemented DAX-based KPIs to track revenue performance, product category insights, and seasonal demand variations.
- Improved reporting clarity by consolidating multiple datasets into a centralized BI model.

Healthcare Conversational Data Analysis | Python, SQL

- Analyzed structured healthcare chatbot datasets to identify intent patterns, resolution rates, and escalation trends.
- Applied text analysis techniques to extract insights from semi-structured conversational data.
- Built summary reports to support improvement of automated response workflows.

EDUCATION

Master of Science, Information Systems	May 2025
Pace University	New York
